

Welcome to Scratch Jnr your parents will need to download the app (it's free). This half term you are going to learn to programme your sprite.

If you don't have a tablet you can log on <https://code.org/learn> and spend your time working through the levels of your chosen activities.

Make sure you take photographs so can share what you have discovered.

Scratch Jr

Discovery Time

The aim is to make
the cat move

You will have 5 mins

Adults cannot answer
questions

Discovery Time

L/O: I am learning the basic features of Scratch Jnr.

I can use Scratch Jnr to give specific instructions and sequence instructions to achieve simple objectives.

I know I can control a range of 'toys' using remote controls and do this with purpose and direction.

I understand how I can programme my sprite using basic features.

Did
You... Change the color of the
cat?

Make the cat move in
more than one way?

Bring in another
character?

The background is a solid yellow color. There are three large, semi-transparent circles: a blue one in the top right corner, a green one in the bottom left corner, and a red one in the bottom right corner. The text "Our Challenge today" is centered in a dark blue, sans-serif font.

Our Challenge today

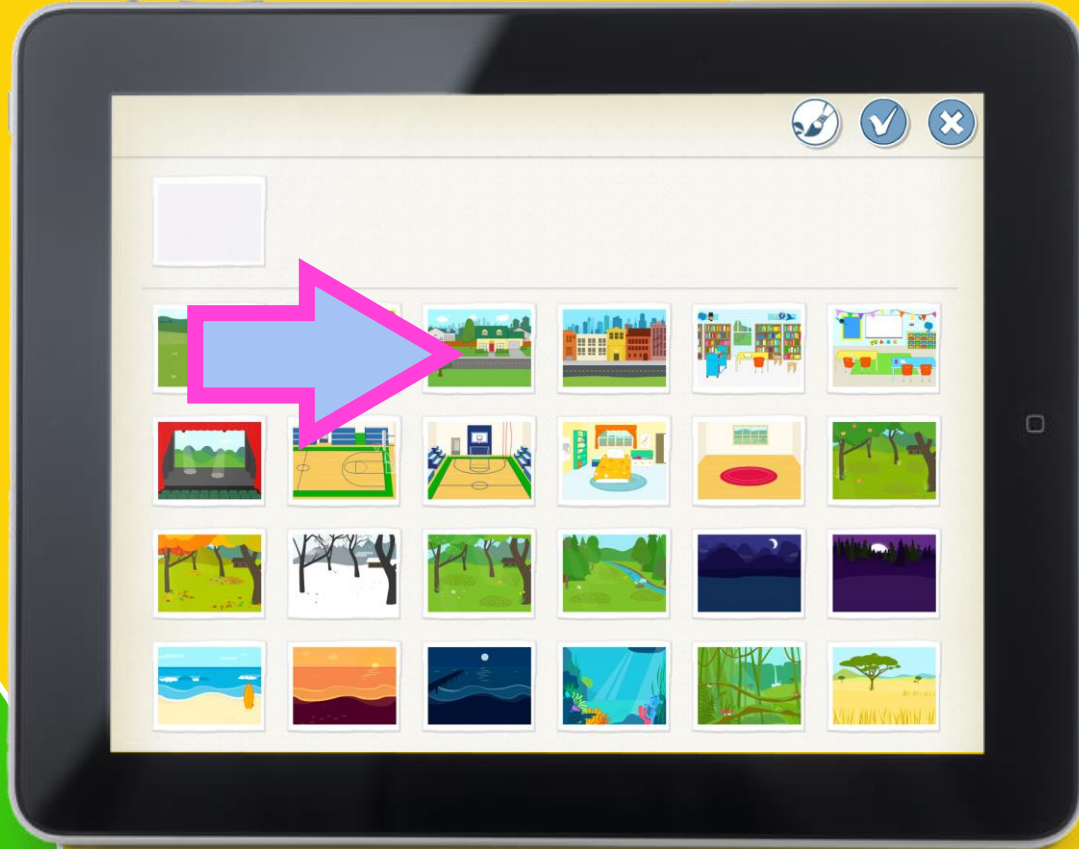

Start a new project

Change the background

Choose the house picture

Move the cat to the tree

Add a start & Finish block

Get your cat to the garage

Use the reset & Play buttons

Adjust your pattern until it's just right

Today's challenge!

Get your cat to move faster
